

FOR IMMEDIATE RELEASE

CellTrust's SecureSMS™ a Winner of the Info Security Products Guide 2009 Tomorrow's Technology Today Award

Secure SMS Selected as Ground-breaking Messaging Security Solution

Scottsdale, AZ – April 22, 2009 – CellTrust (www.celltrust.com) announced today that Info Security Products Guide, the industry's leading publication on security-related products and technologies, has recognized SecureSMS with the 2009 Tomorrow's Technology Today Award. This prestigious award recognizes security vendors with advanced technologies in all areas of information security.

CellTrust's SecureSMS adds significant value to basic text messaging (SMS) with:

- Control to manage confidential information exchange via the mobile
- Accountability with recipient confirmation when SMS is received and opened
- Compliance without costly development or server infrastructure investment
- Security with end-to-end encryption across the mobile ecosystem, i.e. carriers, tower operators, infrastructure providers or aggregators

With CellTrust's SecureSMS, organizations in healthcare, financial services/banking, government, education, travel and mobile advertising/marketing now have the ability to exchange critical information with customers in a trusted environment on the mobile device.

"Threats have no boundaries and security awareness is the key to a proactive approach," says Rake Narang, editor-in-chief, Info Security Products Guide. "Probably nothing differentiates any product or solution more than the superior technologies that make them suitable for today's needs, while pro-actively being ready for tomorrow too."

“We are pleased with Info Security Products Guide’s recognition of CellTrust’s Secure SMS,” said Sean Moshir, Chairman and CEO of CellTrust. “This award further solidifies our vision towards security playing a key role in the global mobile technology roadmap.”

About Info Security Products Guide Awards

Info Security Products Guide is a media sponsor of RSA Conference 2009 and Technosium Executive Alliance Forums engaging Chief Information Officers (CIOs) and Chief Information Security Officers (CISOs). As a technology research and advisory publication, it plays a vital role in keeping decision makers and end-users informed of the choices they can make when it comes to protecting their digital resources. You will discover a wealth of information in this guide including tomorrow’s technology today, best deployment scenarios, people and technologies shaping info security and independent product evaluations that facilitate in making the most pertinent security decisions. The Info Security Products Guide awards recognize and honor excellence in all areas of information security. To learn more, visit www.infosecurityproductsguide.com and stay secured.
